

Ston'Art stone carpet is a durable and aesthetic surface solution. In addition, the surface structure supported by the pore-filling system developed by **Paye Construction** eliminates permeability in interior spaces, facilitating cleaning and maintenance processes while contributing to the preservation of surface performance. This approach transforms **Ston'Art stone carpet** from a simple surface into an integrated system in which usability, maintenance, and long-term continuity are considered together.

AREAS OF APPLICATION

Pools and pool surroundings
Residential indoor and outdoor areas
Terraces and balconies
Landscape areas and walkways
Courtyards and garden areas
Commercial and public floors
Boutique parking areas
Wall and ceiling surfaces
Retail interior spaces
Automotive showrooms

PERFORMANCE CHARACTERISTICS

Suitable for outdoor conditions, with resistance to thermal shock and **high UV++ exposure**
Long service life (when combined with recommended maintenance and protective applications)
High walking comfort
Excellent slip resistance (anti-slip) enabled by its water-permeable structure
Ease for cleaning and maintenance
Fast application and practical solutions
Excellent durability performance

AESTHETIC ADVANTAGES

Natural stone texture
Natural color and pattern options (with stainless steel profiles)
Surface continuity (applicable on both vertical and horizontal surfaces)
Comfortable use

APPLICATION DETAILS

The stone carpet application consists of surface preparation, anchoring stainless steel profiles to the substrate, resin-aggregate mixing, and on-site application processes. This process is carried out with discipline by Paye Construction's site teams, and each layer is inspected by an authorized site specialist. **With the Ston'Art surface preparation system, the application can be easily performed over many existing hard surface materials.**

Paye Construction, with 15 years of on-site experience in stone carpet applications, is a pioneering company implementing the registered Ston'Art stone carpet technology at project scale in Turkey. The company manages design, detailing solutions, and application processes in an integrated manner across its projects.
